

Core Question 2: Is the organization in sound fiscal health?

The Financial Performance Framework, outlined in Core Question 2, gauges both near term financial health and longer term financial sustainability while accounting for key financial reporting requirements.

| 2.1. Short-te | rm Health: Doe | s the school d | emonstrate the | e ability to pay | its obligation | s in the next 1 | 2 months? | |

Excel Center-West receives a rating of <u>meets standard</u> for Core Question 2.1 because it met standard for four sub-indicators and approached standard for the final sub-indicator. At the September 2013 Count Day, the Indiana Department of Education (IDOE) indicated that school had 319 students enrolled. This is 106% of the 300 students that the school promised the community it would serve in its charter contract. The school <u>met standard</u> for its February Enrollment Variance. This sub-indicator is calculated by dividing the number of students enrolled in the school on the February 2014 Count Day conducted by the Indiana Department of Education divided by the number

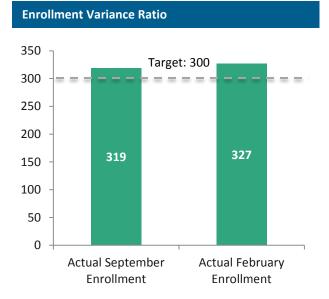

of students enrolled at the time of the September 2013 Count Day. IDOE indicated that the school had 327 students enrolled at the February Count Day. This represents 103% of the number of students enrolled at the time of the September Count Day.

With regard to its current ratio, the school met standard meaning that it had current assets (cash or other assets

that can be accessed in the next 12 months) that exceeded its current liabilities (debt obligations due in the next 12 months) by 10% or more.

Additionally, the school ended the year with 43 days cash on hand and approached standard for this ratio. Days cash on hand is an important measure of a charter school's fiscal health because it indicates how many more days after June 30, 2014, the school would have been able to operate at its seem spending levels without receiving a tuition support payment from IDOE

Lastly, the school <u>met standard</u> for debt default. This metric is determined by both the auditors' comments in the audited financial statements and contact with the school's creditors. In the case of the Excel Center-West, neither its auditors nor its creditors provided any indication that the school had defaulted on its debt obligations.

Based on the summary of these sub-indicator ratings, Excel Center-West met standard for Core Question 2.1 and exhibits strong short term financial health.

The school received a rating of <u>exceeds standard</u> for Core Question 2.2. The school <u>met standard</u> for the net income sub-indicator. It had a current year net income of \$780,903. Since this is the school's first year of operations, it is not possible to calculate the three year aggregate net income.

The school <u>met standard</u> for the debt to asset ratio sub-indicator. The school had a ratio of 0.14 meaning that it had significantly fewer debts than it had assets for the 2013-14 fiscal year.

Lastly, the school's audit indicates that it does not hold any long-term maturities. As a result, it is not possible to calculate a Debt Service Coverage (DSC) ratio for the school.

Given that the school received a rating of meets standard for both applicable sub-indicators, it receives a rating of exceeds standard for Core Question 2.2.

The Excel Center-West received a rating of <u>meets standard</u> for Core Question 2.3 for the 2013-2014 school year. The school received a clean audit from Greenwalt that contained no significant deficiencies or material weaknesses

The school received a rating of meets standard for its financial reporting requirements for timely submission of quarterly financial statements. The initial draft of its audit was submitted on October 30, 2014, well before the deadline.

For these reasons, the school met standard for Core Question 2.3 for the 2013-2014 school year.
